THE FINAL FRONTIER  
HERE

"The Final Frontier" by Mark Gregory was inspired by his love of looking at the night sky with his twins, from his studio in the unspoiled Scottish countryside, where the vast velvety sky is inky black and saturated with stars. They like to play space explorers, making rockets and space stations from cardboard boxes, whilst imagining what undiscovered wonders the universe holds.

## 16 NEW SKUS

CAS0329 Starry Night 15 yds of full collection

Have you ever been in a region without light pollution at night? Miriam Dornemann has. All the stars, the milky way and the moon have left her breathless. So, she spontaneously grabbed her (not very fancy) notebook and a random pen and started drawing elements to create the "Starry Nights" collection. Back home she scanned the icons and turned them into this Starry Night collection. She is now more than excited for the glow-in-the-dark effect, it'll bring back the feeling of those calm nights in the wilderness. She hopes you can feel it, too.
